

ABOUT US

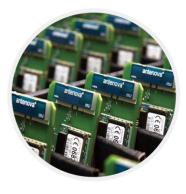

Yves Carrier, Business Development and Sales Manager

CVE: BLN

Product developer

Manufacturer

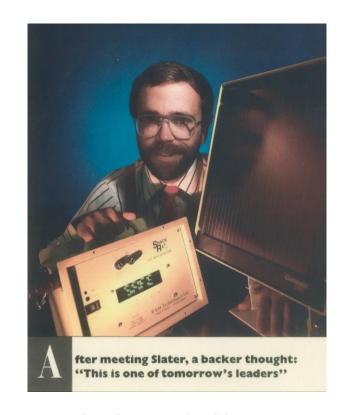

Service provider

Monitoring partner

WE'VE DONE THIS BEFORE

Cody Slater, Blackline CEO Founded BW Technologies

Dr. John Finbow, Blackline board member Co-founded City Technologies

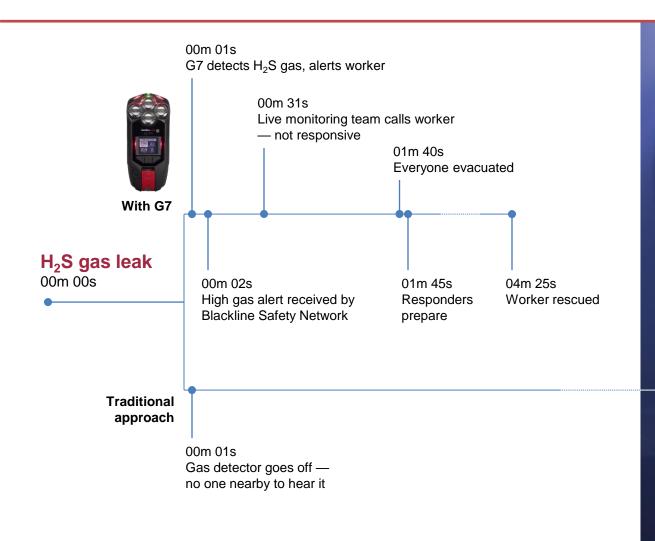

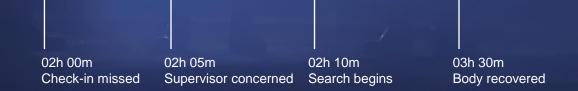

OUR MISSION

"To be the global leader of connected safety and productivity solutions for people working in commercial, public and industrial environments".

RESCUE VERSUS RECOVERY: EMPOWER AWARENESS

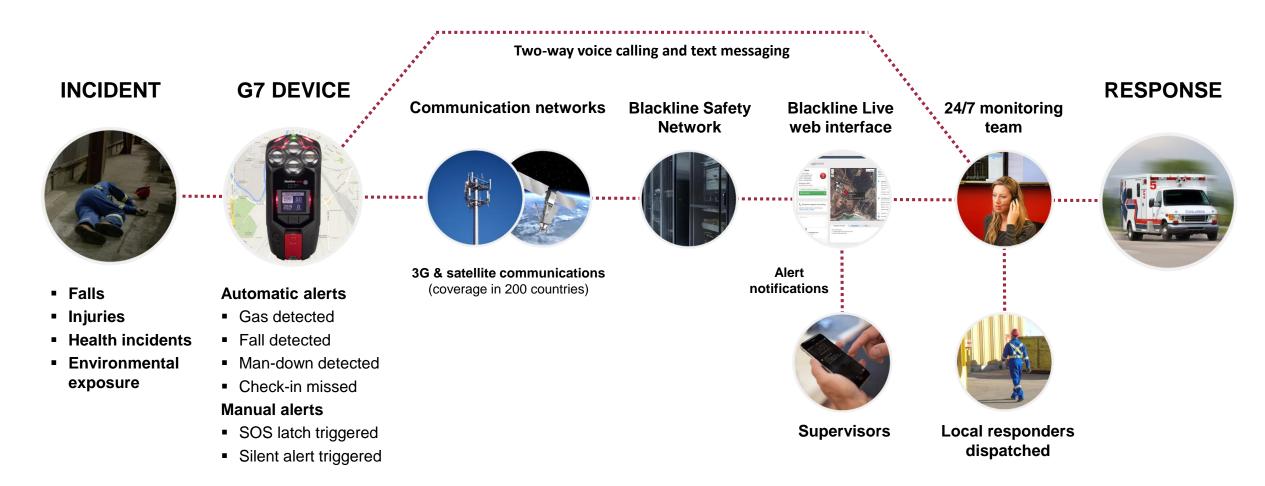

- When an incident occurs, every second counts
- Never before has a comprehensive safety monitoring system delivered:
 - Real-time situational awareness
 - Incident management tools
 - Technology to make a difference

HOW IT WORKS

G7 FAMILY: Configurable to your operations and risk

Satellite Hybrid: Works where 3G doesn't. (Facility or remote in field)

SaaS Monitoring Portal: All access admin control

24/7 Live Monitoring

COMPLETE, TURN-KEY SYSTEM

- Everything works right out of the box
- A tailored, one-vendor solution
- Works everywhere
- No facility communications needed
- No facility power needed
- No software installation
- No IT support required
- Web-based monitoring software

PLUG-AND-PLAY CARTRIDGES

Multi-gas Diffusion

Single-gas Diffusion

Multi-gas Pump coming soon

- Customize according to your needs
- Eliminate downtime field replaceable in seconds

WORLD'S FIRST 'EVERYTHING' DETECTOR

reddot award 2017 winner

CAPABILITIES

Indoor location technology

Floor and site plans

Cloud-hosted monitoring portal

24/7 live monitoring service

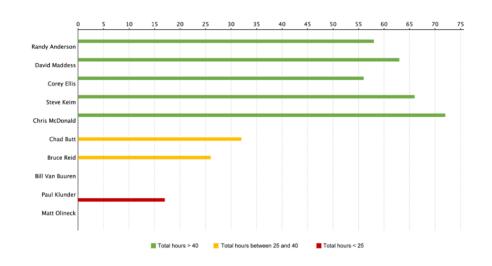

Data analytics

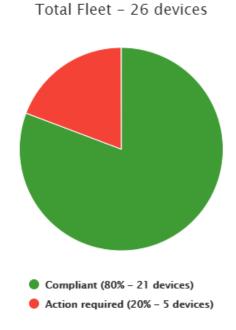

MORE THAN JUST GAS DETECTION

Is it being used?

Is it compliant?

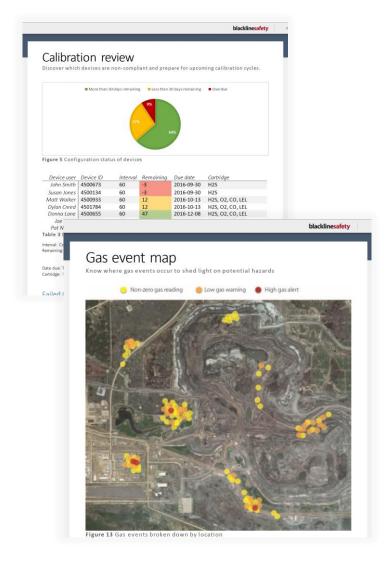

Added Value: Where is it?

REAL-TIME GAS DETECTION COMPLIANCE

- Live connected device, no docks needed.
- Real-time compliance dashboard and reporting
- Calibration and bump test status
- All gas readings communicated
- All gas readings location-tagged
- Preventative maintenance
- Improve productivity and costs

PROVIDING BUSINESS INSIGHTS

Where are gas exposures occurring?

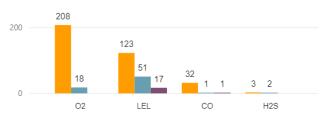

Event by Sensor Type

Event Type

gas_alarm_detected

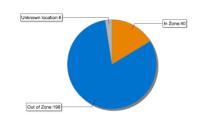

gas_alert_detected

over_limit_gas_alert_detected

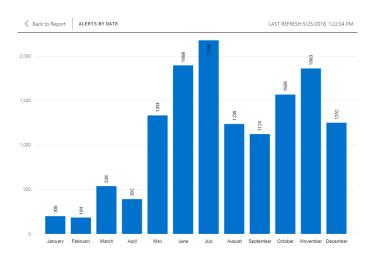

How much time is spent in each area?

What's the data trend over time?

LONE WORKER MONITORING

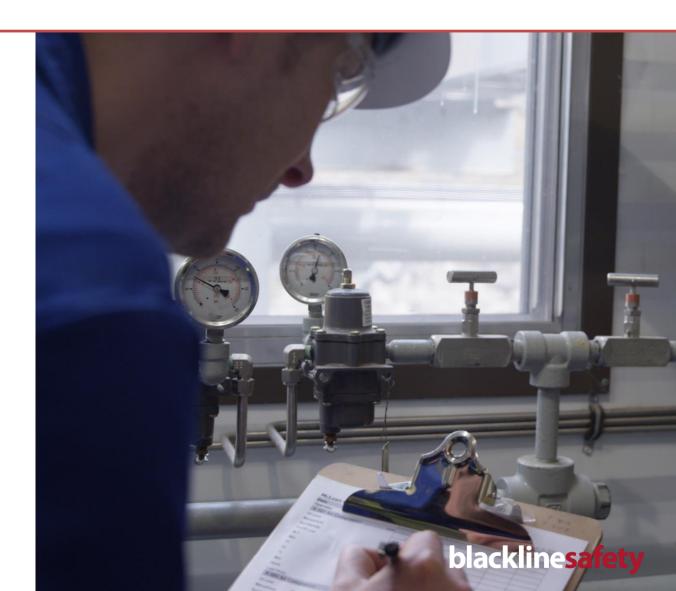

- Personnel working beyond sight & sound of others
- Automatic
 - Fall detection
 - No-motion (man-down) detection
 - Employee check-in
- Manual
 - SOS latch

PRODUCTIVITY

- Make teams personnel more efficient
 - Coordinate teams for turnarounds and shutdowns
 - No more need to buddy-up and no lost time due to manual checks
- Analytics map gas leaks to plan maintenance
- Eliminate downtime due to failed sensors
- No more firmware updates detector reconfiguration projects

CONFINED SPACE ENTRY

Multi-gas Pump Cartridge

 Diffusion by default with user-selectable pump modes

Scenarios

- Confined space pre-entry
- Confined space SCBA

Leak check

TWO-WAY EMERGENCY COMMUNICATIONS

- Monitoring personnel can speak directly to the employee via G7c
- G7c auto-answers no employee action required
- Messaging supports evacuation notification and muster awareness.
- All calls/message logs recorded and stored in for incident reporting
