

Most Important Elements

IP's Contract Coordinator

INTERNATIONAL (A) PAPER

Critical

Position

IP Contract Coordinator (IPCC): The <u>IP</u> employee responsible for the contractor. The IPCC works with the <u>contractor</u> EHS Specialist in planning the job using the EHS Work Plan, performs periodic audits during the job, and once complete, conducts a post job review.

- 1. Ensures pre-qualification is complete
- 2. Confirm site orientations were taken
- 3. Completes the EHS Work Plan and reviews the job with the contractor
- 4. Performs periodic audits
- 5. Completes a post-job evaluation

Contractor's EHS Specialist

EHS Specialist: The <u>contractor</u> employee who is the EHS trained individual who is the liaison between the IP Contract Coordinator (IPCC) and the contracting team. The number of EHS Specialists required depends on the type of work an size of crew.

- 1. Ensures everyone has had site orientation
- 2. Completes the EHS Work Plan with the site IPCC
- 3. Shares the EHS Work Plan with the team
- 4. Conducts periodic audits
- 5. Participates in pre-job safety assessments and daily toolbox meetings
- 6. Manages incidents, if they occur
- 7. Ensures the team is properly trained
- 8. Maintains personnel list and contract info
- 9. Confirms all work permits are completed
- 10. Completes post-job assessment checklist before departure

Most Critical Position

Contractor	# of EHS
Group Size	Specialists
1-20	1 part-time
21-40	1 full-time
41-60	2 full-time
61-80	3 full-time
> 81	4 full-time

EHS Work Plan

EHS WORK PLAN

Dre plan must be completed for each job or annually for contractors, suppliers or service providers with continual, recurring or general presence at the site. Complete form prior to beginning work and post at the job location until work is completed. Use the form to facilitate the pre-job meeting and walkthrough, information sharing, and Pre-Job Stefay Assessments. The IP Contract Coordinator and Contractor EHS Specialitis shall provide a general overview of their pertinent information, policies and expectations (check the appropriate box - Riveiweed, NA-Not Applicable). The level of detail needed is to be determined based on the job, location, nature of the work, and other invideabed factors. The Contractor EHS Specialist shall provide a general overview of mein pertinent information, policies and expectations (check the appropriate box - Riveiweed, NA-Not Applicable). The level of detail needed is to be determined based on the job, location, nature of the work, and other invideabed factors. The Contractor EHS Specialist shall increview applicable policies with the contractor employees.

Completed prior to beginning work

Continual, recurring or general presence contractors, complete EHS Work Plan annually

Plans will include:

- General information
- Key contact & EHS info.
- Hazard communication
- Required procedures, & permits
- Start / Stop Work criteria
