

GMR
SAFETY

**POWER
CHOCK™**

Redefining Loading Dock Safety

Creating an inclusive SAFETY culture

Empowering your entire team to actively participate in maintaining a safe working environment.

YOUR OBJECTIVE : **100% SAFETY**

The chock and restraining plate combination **securing the wheel** provides the **most reliable restraining force on all trailers.**

One vehicle in four has a damaged or missing ICC bar

“Restraining by the wheel provides a higher level of safety than the ICC bar.”

RIG bar can only support a maximum of 11,240 lbs
while the pulling out force of a trailer is approximately 33,370 lbs

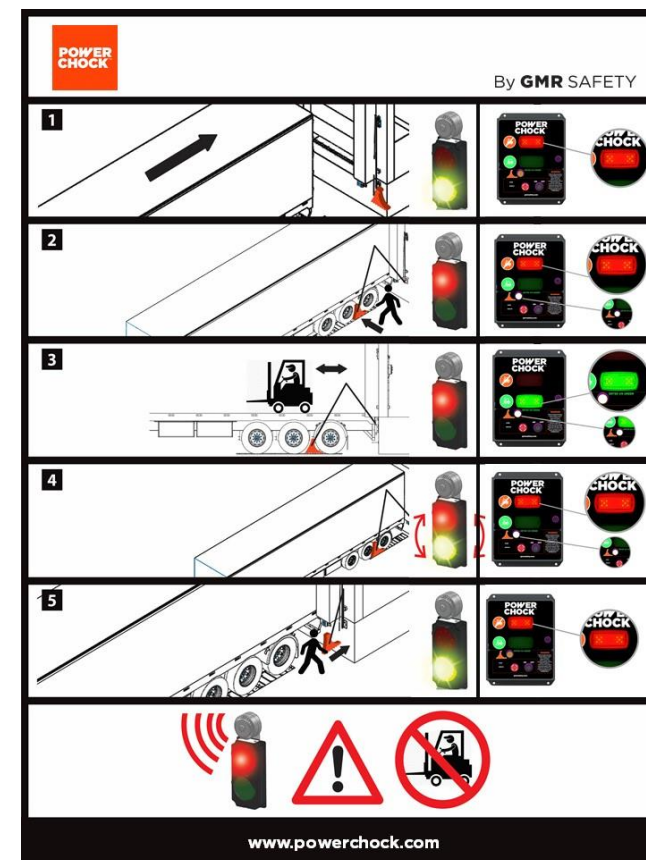

POWERCHOCK 5

WITH ARTICULATED ARM.

FLAGSHIP SYSTEM

- ✓ Restrains the vehicle by its strongest part – the wheel
- ✓ Ergonomic arm makes operation almost effortless
- ✓ Equipped with 3 sensors (arm, wheel & dock) connected to an audio-visual communication system
- ✓ Chock aligned correctly by default when placed in front of the wheel, confirmed by integrated optical sensor
- ✓ Assisted return to resting position confirmed by sensor

The most complete safety
sequence for your operations

THE CONCEPT

The POWERCHOCK™ uses simple physics to restrain the vehicle by its strongest part - the wheel.

A chock and
a restraining
plate

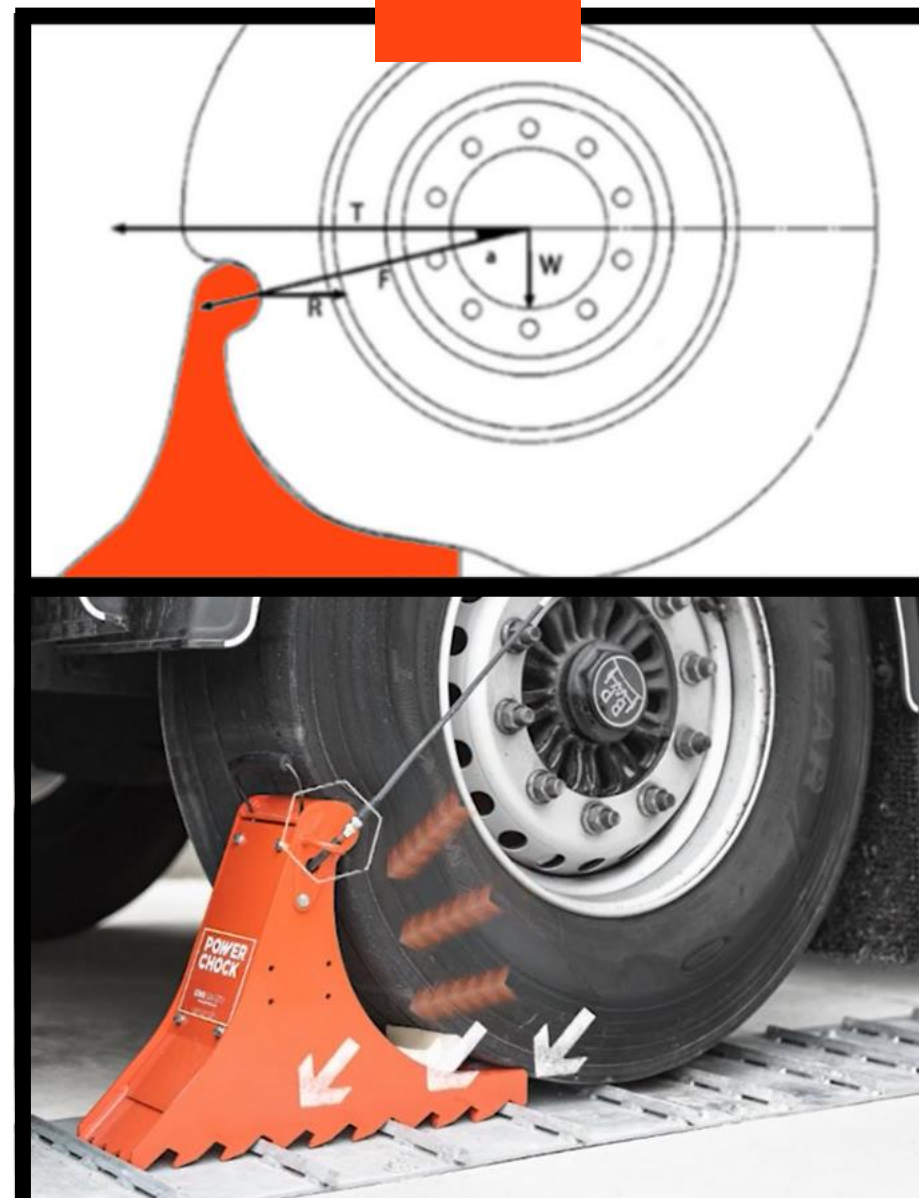

Simple physics

**Withstands up to 50,000 lbs
of direct force.**

**POWER
CHOCK™**

YOUR WARRANTY

**POWER
CHOCK™**

- ✓ Unique & world-exclusive 5-year warranty*
- ✓ GMR Safety is the only manufacturer that warrants its restraint system against unscheduled departure (commonly referred to in the industry as abusive use)
- ✓ Does not require GMR Safety approved technician to remain valid

**5
YEAR**

INDESTRUCTIBLE. GUARANTEED.

**see manufacturer's warranty for details*

YOUR BENEFITS

UNIVERSALLY COMPATIBLE

Works with all types of vehicles including those :

- With damaged/missing ICC bar
- With liftgates

LOWEST TCO

- Long-term investment supports profitability
- No construction investment
- Minimal after sales costs

MAINTENANCE FREE

- No downtime in your operation
- No lubrication required ever

INTUITIVE

- Simple and intuitive to use
- Quick installation [30 sec.]

**POWER
CHOCK**

WINTER CONDITIONS

**POWER
CHOCK**

- ✓ Has been performing for more than 20 years in extreme winter conditions
- ✓ 3D ground plate withstands snowplowing
