

HexArmor®

| **protecting people**

Next level cut protection –
Helix® 3062 + 3062IMP

The HexArmor brand

The mission:

HexArmor exists to protect people, to send every worker home safe, every day. But we're more than PPE. We're the confidence, safety, and livelihood of those we protect.

The products:

HexArmor products provide the confidence to gear up for a hard day's work. Created with industry-changing technology and centered on Wearability®, our safety products provide the unparalleled comfort, fit, performance, and style needed to keep workers willingly wearing them day in and day out.

The personality:

- Educators and safety guides
- Constantly elevating the safety conversation – our focus is always on innovation, technology and beating industry standards

70% of workers who experience a hand injury are not wearing gloves.

-OSHA

Another 30% of workers have gloves on, but they are damaged or inadequate for the work task.

Why?

- The **comfort** or **fit** of the work-issued gloves are poor so they're taken off.
- **Performance:** unsolved cut, puncture, grip problems in certain industries/applications
- **Style:** The gloves look “uncool,” so workers don't want to wear them.
- The glove isn't right for the environment, hazard, application, etc.
 - Ex: the site may need 3-4 glove solutions, but is only providing 1 glove solution for all applications/tasks – resulting in the wrong protection
 - Under protecting
 - Over protecting

the good news?

Proper glove use has been proven to reduce the risk of hand injury by over 70%.

the even better news?

The gloves I am about to show you are thoughtfully designed with **Wearability**[®] in mind: the perfect balance of comfort, fit, performance and style that your people will actually want to wear

Helix® 3062

....the technical details

Helix® 3062

Your teams in the industry said....

- The increased dexterity and comfort makes them actually want to wear the glove because they have those benefits and feel protected against sharps
- The 360 cut protection is a huge benefit when some don't offer that
- "It feels better than the A4's I was wearing before"
- A customer was able to move from 20 glove SKU's to 9 with the 3062/3062IMP

Helix® 3062IMP

Onto the impact counterpart....

- “I feel protected against sharps and knuckle bashes (with the IMP).”
- “I don’t have to sacrifice dexterity to get the protection on the back of my hand in tight spaces.”
- “It’s a unicorn!”

Thank you!
