HuComply helps you manage tasks across your organization, mitigate compliance risk, and ensure that conducting business in an ethical and responsible manner is critical.

HuComply is an app that gets you going fast without the sizable efforts of traditional compliance. Find the User Manual in the left hand navigation bar to your left for more information.

Content Development

Software alone does not drive compliance. It is the content you put in it that makes the difference. You are in expert hands with our decades of experience helping Fortune 500 companies.

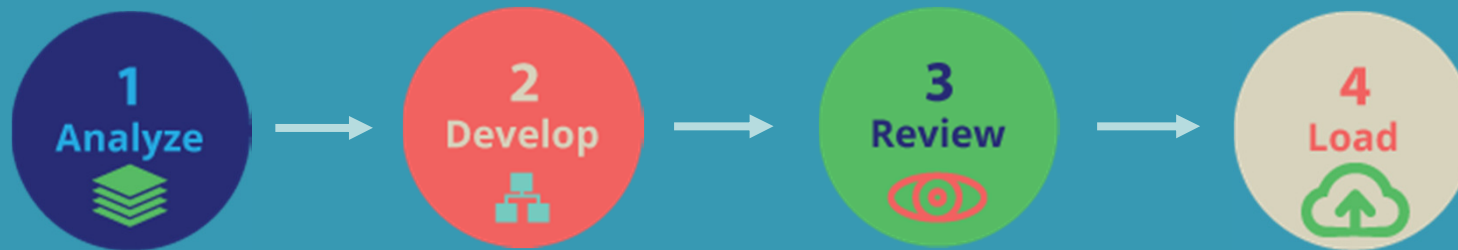

We've deconstructed permits in over 40 U.S. States and have reviewed permits in over 100 countries.

Where do the tasks come from?

Deconstruction Process

AR Site Operations:

This is the second and final reminder to complete the task titled : Throughput of Oil Tanks

Task Description : For the previous month, maintain throughput information for each oil tank and verify that the 12-month consecutive sum does not exceed 500,000 gallons. Verify that turnovers of each tank do not exceed 25 turnovers in the consecutive 12-month period and that bills of lading for incoming and outgoing oil shipments are maintained on site. Submit annual total and each month's individual data to the Department in the semi-annual report.

Please click on this [link](#) to update task status.

Please complete the task by 5/28/2015.

*** This is an auto-generated email, please contact your Facility Admin for questions about the task ***
