Have you come to that point in your life yet when you’ve had that heart-to-heart talk with yourself concerning SAFETY?

I believe that we ALL do, at some point in our lives. It usually goes something like this.
PPSA

At least for me it did!

I asked myself these earnest questions.

- What do I really think about SAFETY?
- Why am I CONTINUALLY hurting myself?
PPSA

- Am I at risks and don’t even realize it?
- Am I cocky, ignorant, or arrogant?
- Do I think it can’t happen to me?
- What am I willing to do, to keep myself SAFE from here on?
PPSA

- How will I assess progress?
- How can I influence others to be SAFE?
- What are the consequences for me if I do nothing?
- Why am I apprehensive to commit myself completely?
If you are completely honest, you must fully commit to keep yourself and those around you SAFE!

Remember: SAFETY excellence is only achieved through individual commitment.
PPSA

- If you and I are incident **free** for a month, a year, or five years, our incident rate is **zero**.

- If one or two, or five of us can achieve this level of **excellence**… we all can!

- A **zero** incident rate for any Company truly is **achievable**!
Top Ten SAFETY “Doug-ism’s”

1. **NEVER** go to work un-rested!

2. **NEVER** stay in the mill longer than the policy allows!
3. NEVER allow yourself to become Complacent, ever!

4. NEVER do a job, or complete an act when you already know it is unsafe!

5. NEVER fear telling another person how to behave regarding any SAFETY issue at any time!
PPSA

6. **NEVER** walk under the Crane with a suspended load!

7. **NEVER** forget the “FAIL-START” as the last step of the lock-out, tag-out procedure!

8. **NEVER** fail to respect all Machinery!

9. **NEVER** fail to expect the un-expected!
PPSA

Last, & most **IMPORTANT** of all else:

10. **NEVER** ever fail to set an example for our Operators and other Employees, as they are always watching us!
