A Letter From Our Chairman

Peter Masias
Corporate Director of Safety & Risk Management
Green Bay Packaging

What a Great Year PPSA Members!

With the New Year in full swing, we wanted to provide you with the most up-to-date safety information. Inside this quarterly report, you will find the End of Year Injury and Illness Statistics reports. If you have questions regarding the reports, please let us know.

PPSA is currently in the middle of planning our 71st Annual Conference in St. Petersburg, Florida at the [Viony Resort June 22-25](http://www.ppsa.org/14conference) (www.ppsa.org/14conference.) This year the conference theme is The Flaming Cs of Safety. Attendees can expect some HOT topics to include individual commitment and the importance of developing a caring culture, new control methods celebrating safety innovations, and life changing injuries and how to focus on the high risk areas.

In addition to our upcoming conference, PPSA is pleased to welcome three new board members - Hazel A. Ladner, Regional Safety and Health Manager for North America at MeadWestVaco, Steve Gearheart, Safety Director at Hartford City Paper, and Eric Barnes, Regional EHS Manager for International Paper. Be sure to welcome Hazel, Steve and Eric at the June Safety and Health Conference.

This year PPSA is looking to add webinars to our list of member benefits. We are aiming to do one every quarter. If you are seeking training on a certain topic, let us know and we may be able to help. Please send all your ideas to the Education Committee Chair – Sue Cooper, sue.cooper@weyerhaeuser.com or Elise Hitchcock, ehitchcock@pps.org

We hope you enjoy this quarterly report and that everyone ended 2013 with great safety records. We look forward to bringing you up-to-date safety information throughout the coming year and look forward to seeing you all in June.

Thank You -
Peter G. Masias, CSP
PPSA Board Chairman

A Letter from the Conference Chairman

Matthew Kanneberg
Division Safety Manager, Containerboard Mills
RockTenn

The Flaming Cs of Safety

The [*Flaming Cs of Safety*](#)...no doubt one of the 'hottest' and 'fiery' safety conference titles ever. Ok, maybe we had a little too much fun when deciding the title, but the flaming description certainly does not underscore the importance of a critical few attributes of a strong safety culture. We have centered the conference on three day themes of **Caring Leadership**, **Control** with an emphasis on modern safety innovation and technology, and the inevitable **Consequence** of risk that contributes to life changing injuries.

There has been genuine excitement this year around the great speakers who will be supporting our conference. Our speakers make up a diverse group from among our industry, within the safety and health field as well as some of North American's most well-known motivational and technical speakers.

We are proud to announce **Dave Weber with Weber Associates** as our conference Key Note speaker. Learn more about Weber Associates at www.weberassociates.com or see more info about Dave at www.daveweber.com.

We are challenged every day to do what seems impossible - create an injury free culture. What some do not realize is that several of our own member sites are doing just that. Caring leadership that strives to build respect and trust, cultivate open communication and empower and engage everyone is certainly at the heart of that strong safety culture. For some the word caring means soft and if we think of the most influential caring leader in our life, most times the term "soft" would not enter our mind. Caring leaders will use the unfortunate consequences of incidents/injuries to learn and make their site safety management system better – seeking true root causes without a focus on blame. Caring leaders will also seek out innovation to make processes efficient, interesting, fun and accessible to all.

If you want to know who to send to this year's conference, the answer is simple...anyone who has a passion to be a safety leader. The term leader does not have to equate to manager. A safety leader is any person who has a passion to improve their knowledge in safety, collaborate ideas with fellow industry members, and be open to new and innovative ideas. Though the majority of conference participants continue to be health and safety professionals, the heart of this year's theme is around caring leadership and we certainly encourage leaders at all levels of your organization to consider just a couple days to expand their safety knowledge!

See you in St. Petersburg!
Matthew Kanneberg
Conference Chairman

PULP AND PAPER SAFETY ASSOCIATION
THE FLAMING Cs OF SAFETY

CARING COMMITMENT • CONTROL • CONSEQUENCE

PPSA hosts the
71st Annual Safety
Conference June 22-25, 2014
at the Renaissance Vinoy
Resort in St. Petersburg, FL.

ATTENDEES CAN EXPECT SOME HOT TOPICS TO INCLUDE:

1 DAY ONE

Individual Commitment and the Importance of Leaders Developing a Caring Culture

We devote the day to individual commitment and learning the importance of influence to cultivate a caring culture.

2 DAY TWO

New Control Methods That Celebrate Safety Innovations within Our Industry

Day two will include a spirited competition amongst PPSA member sites for the first annual Safety Innovator Award as well as new innovations from our Vendor/Supplier members.

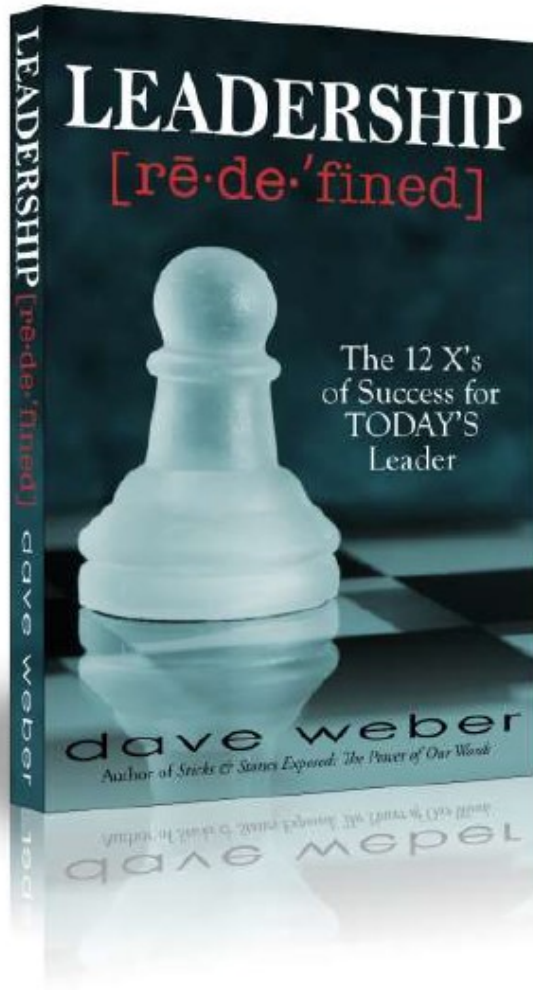

3 DAY THREE

Life Changing Injuries and How To Significantly Reduce Serious Injuries

The last day's sessions will highlight the consequence of serious incidents and share precursors and control strategies for avoiding these life changing injuries.

2014 Health and Safety Conference Key Note Speaker

DAVE WEBER

**Motivational Speaker
Inspirational Author
& Leadership Trainer**

**Would you like to know the skills and attitudes that
GREAT leaders strive to master in order to positively impact
the world around them?**

Some people define leadership by a position or a title. Some by responsibility or authority.

And while these descriptions may have worked in the past, they are far too narrow for the challenges businesses today. The time has come for a new kind of leader...a leader without the title. In his new book Leadership Redefined, Dave Weber sheds light on the truth that leadership is a matter of influence. From the board room to the break room, the influence that every individual brings to the table can have a profound impact on the performance of a company.

Dave's high-energy and humorist style, demonstrates the 12 practices that will help you grow your own leadership capacity, bring about systemic change in your organization, and usher in real success.

Safety Culture

DONNIC CONSULTING GROUP, LLC

*Our Beliefs
Become Our
Safety
Standards*

Culture Change: People Are the Key to Safety Excellence

Companies that embrace a *safety culture change process* demonstrate their caring and commitment to employee health and safety by implementing improvements that enhance processes while controlling spending.

Culture change focuses on people
Culture change is not new. It has been successfully used by major corporations such as Southwest Airlines and Alcoa. In both cases, the CEOs focused on their people. Herb Kelleher, CEO of Southwest, espoused a philosophy of "treat employees well". Paul O'Neill was Alcoa CEO for 14 years. When O'Neill took over, Alcoa's lost time rate was one third the national average. When he retired, it was reduced to one twentieth!

Culture Change requires effort.
It takes communication, trust, and intervention. It must involve everyone.

Change a Person's Attitudes & Beliefs & You Can Save A Life

"Human beings can alter their lives by altering their attitudes and mind" William James

In the safety environment, changing a person's attitude about safety can not only change a life, it can save a life. Safety culture change programs inspire a new vision that's simple, powerful and makes sense.

When safety programs are imposed on the workforce by management there is enormous resistance and reduced ownership. The DONNIC process provides a structure for participation and involvement that increases engagement at all levels. Old limiting attitudes and beliefs shift. Safety becomes a personal program that benefits "me and my family".

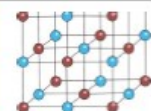

*"In order for Alcoa to be a world class company, it had to be the safest."
Paul O'Neill, CEO*

Culture change safety trainings helped workers in the petrochemical field maintain focus during periods of industrial and economic turmoil.

OSHA proposes new rule to improve tracking of workplace injuries and illnesses

OSHA Quicktakes Newsletter

On Nov. 7, OSHA issued a proposed rule to improve workplace safety and health through improved tracking of workplace injuries and illnesses. The announcement follows the Bureau of Labor Statistics' release of its annual Occupational Injuries and Illnesses report, which estimates that three million workers were injured on the job in 2012.

"Three million injuries are three million too many," said Assistant Secretary of Labor for Occupational Safety and Health Dr. David Michaels. "With the changes being proposed in this rule, employers, employees, the government and researchers will have better access to data that will encourage earlier abatement of hazards and result in improved programs to reduce workplace hazards and prevent injuries, illnesses and fatalities. The proposal does not add any new requirement to keep records; it only modifies an employer's obligation to transmit these records to OSHA."

The new proposal would require that establishments with more than 250 employees who are already required to keep records to electronically submit the records on a quarterly basis to OSHA. The agency is also proposing that establishments with 20 or more employees, in certain industries with high injury and illness rates, electronically submit their summary of work-related injuries and illnesses to OSHA once a year. For more information on the proposed rule, read the [press release](#) and visit the Improved Tracking of Workplace Injuries and Illnesses Rulemaking [Web page](#).

The public had 90 days, through Feb. 6, 2014, to submit written comments on the proposed rule. On Jan. 9, 2014, OSHA held a public meeting on the proposed rule in Washington, D.C. For information, read the [Federal Register notice](#).

For the Life of a Friend

What **would** we have done, to save our friends life,
Had we known he was going to die.

How long will we suffer, and wake up at night,
To **grieve**, and to ask ourselves **why**?

The risk that he took, must not have seemed bad
No worse than some others he'd taken.
He thought he could save time, without getting hurt,
And **this time**, he was simply mistaken.

We cannot take back that horrible day,
Our **chances were missed**, and they're gone.
Now, all we can do, is to learn from the loss,
And improve things, as we carry on.

For the Life of a Friend - are we willing to **Change**,
The way we expect things to be?
For the **Level of Safety**, on which lives depend,
Is determined **by you**, and **by me**.

The behaviors and risks, we accept as a group,
Set the bar, when decisions are made.
The rules and procedures don't count near as much,
As the **care**, and **concern** that we've paid.

For the Life of a Friend - are we willing to **Look**,
At each job task, **as if it were new**?
To be sure **all the hazards**, are known, and controlled,
And that everyone knows what to do.

For the Life of a Friend - are we willing to **Learn**,
The policies, procedures, and rules?
For employee protection, and hazard correction,
They're **important**, and **valuable tools**.

For the Life of a Friend - are we willing to **Stop**,
And say **No**, when the job is not right?
And work through the problems, to **get them resolved**.
Not ignored, or just moved out of sight.

For the Life of a Friend - are we willing to **Speak**,
When we see, someone else could get hurt?
To challenge the risk, the tools, or the job,
Or their simply, **not being alert**.

For the Life of a Friend - are we willing to **Thank**,
Those who do their job, Safely and Well?
If we want them to know, **how important that is**,
Then it's **them**, that we most need to tell.

We cannot keep doing, what we've always done,
And expect things to change in the end.

We have to improve, or on some future date,
We will Grieve - For the Life of a Friend

IMPORTANT SAFETY NOTICE

Red Wing Shoes Recalls 42 Styles of Steel Toe Safety Footwear

An issue in the steel toe cap could fail to protect the wearer's feet in an impact.

The footwear was sold between December 2012 and November 2013. There are 42 styles of Red Wing branded products that are covered under this notice. However, only certain sizes within each style are affected. Only those styles, sizes and widths with a manufacture date code between December 2012 and November 2013 are affected. See list of affected styles and sizes below.

The affected style number, size, width and manufacture date can be found on the product label on the inside of the boot.

2206 6-inch Boot Sizes: D 13,14,15 EE 11,11.5,12,13,14 H 11,11.5,12,13	2211 8-inch Boot Sizes: D 13,14,15,16 EE 11,11.5,12,13,14 H 11,11.5,12,13	2223 6-inch Boot Sizes: B 15 C 13 D 13,14,15,16 E 13 EE 11,11.5,12,13,14,15 H 11,11.5,12,13	2226 6-inch Boot Sizes: B 15 C 13 D 13,14,15,16 E 13 EE 11,11.5,12,13,14,15 H 11,11.5,12,13	2230 11-inch Pull-On Boot Sizes: D 13,14,15 EE 11,11.5,12,13,14 H 11,11.5,12,13	2238 8-inch Boot Sizes: B 15 D 13,14,15,16 E 13 EE 11,11.5,12,13,14,15 H 11,11.5,12,13

Globally Harmonized System Update

By John DeVeau - RockTenn

By now hopefully everyone has met Phase 1 of the OSHA deadline for providing our employees with the required information and training mandated by OSHA's new GHS "Global Harmonization System". OSHA required that all employees be trained on the new label elements (i.e., pictograms, hazard statements, precautionary statements, and signal words) and SDS format by December 1, 2013. If by chance you have missed this deadline or are looking for more training materials OSHA has posted some good materials that I would recommend you check out on their website.

As we move towards Phase 2 "Compliance with all modified provisions of this final rule" the following Major changes to the Hazard Communication Standard needs to be addressed.

- **Hazard classification:** Provided the specific criteria for classification of health and physical hazards, as well as classification of mixtures.
- **Labels:** All labels must include a harmonized signal word, pictogram, and hazard statement for each hazard class and category. Chemical manufacturers and importers will be required to provide this information. Precautionary statements must also be provided.
- **Safety Data Sheets:** Need to be in the specified 16-section format.
- **Information and training:** Continue to train any "New Hires" on the new labels elements and safety data sheets format, as well as all employees to facilitate recognition and understanding.

The table below summarizes the phase-in dates required under the revised Hazard Communication Standard (HCS):
Taken from OSHA's [website](#)

Effective Completion Date	Requirement(s)	Who
December 1, 2013	Train employees on the new label elements and safety data sheet (SDS) format.	Employers
June 1, 2015*	Compliance with all modified provisions of this final rule, except:	Chemical manufacturers, importers, distributors and employers
December 1, 2015	The Distributor shall not ship containers labeled by the chemical manufacturer or importer unless it is a GHS label	
June 1, 2016	Update alternative workplace labeling and hazard communication program as necessary, and provide additional employee training for newly identified physical or health hazards.	Employers
Transition Period to the effective completion dates noted above	May comply with either 29 CFR 1910.1200 (the final standard), or the current standard, or both	Chemical manufacturers, importers, distributors, and employers

Continued on Page 15

During the phase-in period, we will be required to be in compliance with either the existing HCS or the revised HCS, or both. OSHA stated they recognize that our hazard communication programs will at times have labels and SDSs under both standards which will be present in the workplace. OSHA stated this will be considered acceptable, and we will not be required to maintain two sets of labels and SDSs for compliance purposes see “Transition Period” in chart above.

The United Nations revises the GHS every two years and OSHA plans manage and communicate changes to the Hazard Communication Standard thru:

Technical updates for minor terminology changes,

Direct Final Rules for text clarification, and

Notice and Comment rulemaking for more substantive or controversial updates such as additional criteria or changes in health or safety hazard classes or categories.

According to OSHA they expect that the GHS will be a “living document” and stated “further changes may be adopted on a two year cycle” Presently most of the recent updates have been clarification of text.

OSHA does anticipate that future updates to the Hazard Communication Standard (HCS) may be necessary and they can do this through various rulemaking options, including those mentioned above.

Your PPSA Communication Committee will be watch this closely and will provided any updates to this subject as well as any regulatory activities we become aware of.

The Executive Eagle Award Nomination Information

This prestigious award is given each year to honor a pulp & paper industry executive who has made a significant contribution to the safety & health programs within their area or areas of direct responsibility and has a demonstrable record of support for PPSA.

To nominate an Executive for this award, please review the nomination procedure, complete this form and submit it along with your accompanying information via email or regular mail:

PPSA
15 Technology Parkway South
Suite 115
Peachtree Corners, GA 30092
ehitchcock@ppsa.org

All nominations must be received by March 5, 2014

Nomination Procedure for the Executive Eagle Award

Eligibility

To be eligible for the Executive Eagle, the nominee must be a Corporate CEO, COO, CFO, Senior Vice-President or Area, Region, Division, or Facility General Manager.

Criteria

A member of PPSA must submit the nomination. The nominee must have made a significant and sustained contribution to the improvement of his or her company's safety process or culture and in some way impacted the industry. The nominee must be directly involved with, directly lead, or directly impact safety. They must also demonstrate active support of PPSA.

Procedure

Nominations must be submitted and received no later than March 5, 2014. The recipient of the Executive Eagle **must** be able to attend the conference Awards Banquet on June 25, 2014 to receive the award.

The simple nomination form must be completed, but should be accompanied by a narrative document explaining why this candidate should be chosen. The nominee's qualifications, experience, influence, involvement, education, work history and safety successes should be outlined in the narrative. You should include any additional documents, copies of previous awards or pictures to help tell the story. Remember that you are trying to promote your nominee and how he or she has been involved in safety, how they have impacted safety, how they have achieved success in safety and why they should receive the Executive Eagle.

When completed, send the nomination packet to PPSA. Remember the packet must be received by March 5th.

The Association Awards Committee will review each nomination and certify eligibility. The committee will then review each nomination with the Board of Directors.

The Executive Eagle Award will be presented each year at the PPSA Health and Safety Conference.

Nomination form on the next page

The Executive Eagle Award Nomination Form

Submitted by: _____

Submit narrative and supporting information as described in the procedures

Year: _____

Nominee: _____

Title: _____

Company: _____

Address: _____

Phone: _____

Length of time at current position: _____

Please submit nomination form along with any supporting documentation to PPSA no later than March 5, 2014.

Safety Innovator Award Information

The new PPSA **Safety Innovator Award** will go to the **one facility** demonstrating the most innovative safety improvement product/process implemented between January 1, 2013 and April 18, 2014. In order to receive this award, a facility must apply for it using the following form. The PPSA Awards Committee will screen all applications and narrow the field down to the top submissions prior to the PPSA Annual Safety Conference June 22-25, 2014. The top four submissions will present their safety innovation at the conference to all attendees. The conference attendees will vote on the best innovation to determine who will take home the award!

Criteria and Eligibility:

- Submitting facility must be a PPSA member site at the time of submission of this application. Go to www.ppsa.org to become a member!
- The innovation must be for the purpose of improving the safety and health of employees within the forest products industry.
- Awards finalists must be able to attend day 2 and 3 of the PPSA Safety & Health Conference on June 24 - 25, 2014 and attend the awards banquet the evening of June 25th. Finalists must register as an attendee for the conference to be eligible for the finals and award.
- The innovation must have been implemented between January 1, 2013 and April 18, 2014.
- Application review and judging will assess the innovativeness, scope of impact to safety, and the cost efficiency with either its design or its value to offset cost/loss. Special consideration will be given to those products/processes that involved and engaged employees at multiple levels either in the design or implementation phases.
- All applicants must agree to share their innovations with the PPSA membership regardless if they are selected as a finalist. PPSA will honor and share any copyright and/or patent information.

Note: Email PowerPoint or other supporting documents (videos, pictures, etc.) as necessary to support your application.

Questions about the process and award, contact Terry Hughes (terryhughes@domtar.com)

Please submit this application and any support material to Elise Hitchcock (ehitchcock@pps.org) by April 18, 2014.

Nomination form on the next page

Safety Innovator Award Application

Submitted by: _____

Submit narrative and supporting information as described in the procedures. Please use additional pages for the application if necessary.

Company Name: _____

Facility Location: _____

Contact Person: _____

Phone #: _____

Name of Process/Innovation:

Description of the Process/Innovation:

Results the Process/Innovation Achieved: Provide actual results data if available such as incident rate improvements, costs to implement and cost improvements attained, etc.

Please submit application along with any supporting documentation to PPSA no later than **April 18, 2014**.

OSHA's Proposed Rule on Electronic Submission of Injury and Illness Records

By: Charlie Morgan

On November 8, 2013, OSHA published a proposed rule to require certain employers to submit electronically to OSHA current injury and illness records. See Improve Tracking of Workplace Injuries and Illnesses (Proposed Rule), 78 Fed.Reg. 67254 (Nov. 8, 2013) (<http://www.gpo.gov/fdsys/pkg/FR-2013-11-08/pdf/2013-26711.pdf>). Included in the proposed rule is OSHA's intent to post the injury and illness data online to provide public access to the employers' records.

Among other things, the proposed rule would require as follows:

Quarterly electronic submission of injury and illness records for every "establishment" (defined as "a single physical location where business is conducted or where services or industrial operations are performed") that is required to keep records under Part 1904 and has 250 or more employees;

Annual electronic submission of injury and illness records for every establishment with 20 or more employees and is classified in any industry listed in proposed Appendix A (which includes manufacturing); and

Electronic submission of injury and illness records if OSHA requests such submission.

The comments to the proposed rule note OSHA's intention to post the injury and illness data online available to the public, commenting that

The Agency believes that public access to "timely, establishment-specific injury and illness data will improve workplace safety and health;"

With the posting of data, "employers could compare injury and illness rates and hazards at their establishments to those at comparable establishments;" and

"[P]otential customers might choose to patronize only the businesses in a given industry with the lowest injury/illness rates."

The rule is not final, and OSHA is in the process of soliciting comments to the proposed rule. OSHA recently extended the comment period, with a new deadline for comments of March 8, 2014. See 79 Fed.Reg 778 (Tues. January 7, 2014)

EHS Training Survey Results

PPSA Member Survey Results

Executive Summary

A PPSA member company conducted a survey with the goal of benchmarking what others in the industry are doing around EHS training. The Survey included 9 questions, including questions about organizational size; number of training participants within each organization, methods of training and cost evaluation. We encourage these results to be used to inform and prioritize EHS training development within the industry.

The survey indicated that overall; more than 75% of members surveyed are employed within an organization with less than ten thousand employees. On an average over 65% of employees complete greater than ten training courses per year. More than 55% of members reported training provided for employee learning consisted of a mixture of classroom, E-learning and on-the-job training. Many employers (more than 85%) develop EHS training materials both in-house and by external vendor. Responses to the survey indicated 70% of training completed was due to company policies and 30% regulatory requirements. More than 85% training completed was due to job-specific training. Most members were unaware of how much was spent on corporate level training each year, while 25% estimated less than \$25,000.

If you have a question you would like answered, let us know. Email Elise Hitchcock at ehitchcock@ppsa.org

Examinetics wants to be your hearing conservation partner! We are the largest provider of onsite occupational health screening and data management services in the United States.

Let us bring one of our 70 mobile units to your location, anywhere across the 48 contiguous United States!

We will store your safety records on our HIPAA-compliant **XM** database for your access 24/7!

Call us today to find out how we can help you with your hearing conservation program!

CHEMICALS CAN'T COME CLOSE

CARBONX

There are protective fabrics that resist heat. There are protective fabrics that resist chemicals. Now there is a protective solution designed specifically for the Pulp and Paper industry that does both.

CarbonX® CR-Repel™ delivers ultimate protection against hot chemicals and high-heat processes commonly used in processing pulp and paper. It is made of the patented CarbonX blend of high-performance fibers—proven to provide extraordinary protection against extreme heat and direct flame—and a proprietary compound that enables the fabric to remarkably defend against chemical exposure.

CR-Repel is truly non-flammable and will not burn, melt, or ignite, even after intense heat or flash fire exposure. It far exceeds the industry's standard levels of protection, yet is lightweight, soft-to-the-touch, and comfortable. **CarbonX is the only choice when safety matters most.**

Visit the CarbonX table (#19) at the PPSA Safety and Health Conference.

A non-profit, non-political, international organization, devoted to safety throughout the paper industry. From forest products to paper mills, to converting plants, to recycle collections centers, our membership is grouped by category to ensure a fair and appropriate basis for comparison.

The association began in the 1940's as the Southern Pulp and Paper Safety Association, later changing the name to reflect our widening membership base. We currently have members throughout The United States, Canada and other countries. We work to promote safety, to set reasonable and attainable goals, to educate our members, and to give the members a forum for discussion.

Membership in the Association is by operating facility, such as a paper mill, box plant, sawmill, woodlands, etc. Approximately 380 operating facilities are currently members. Annual Membership is based on employee numbers. We also welcome supplier members as well.

Membership in the Association has many advantages:

- Participation in the Annual Health and Safety Conference and service as a member of the Board of Directors provides an opportunity for personal and professional growth.
- Participation in our webinars and training seminars.
- The Pulp and Paper Safety Association is the **ONLY** national organization exclusively concerned with accident prevention in the forest product industry.
- The annual Conference provides great face-to-face networking opportunities.
- The Quarterly Report provides a way of bench-marking your own performance with others in similar operations.
- The Awards program provides a prestigious form of recognition to outstanding short-term and long-term safety performance by operating categories.
- The Association is an excellent forum for keeping up with latest OSHA standards. In-depth information on specific subjects is increasingly available at regional seminars. The cost of these seminars is minimized by virtue of holding them on a regional basis.
- The annual conference provides a fine external motivational boost to hourly Safety Committee members as recognition for their active participation in your safety program.
- The cost of membership is the lowest of any association to our knowledge.
- The attendance of vendors at our annual conference allows safety people to keep up with the latest safety equipment, tools and training.
